

Introduction

Winchester City Council is proposing to develop a small number of council homes on land owned by the council -

- All of the new homes would be owned and managed by the council
- It is intended that the homes would be for rent
- The properties would be available to people with a recognised local connection to Sparsholt

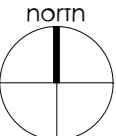

Aims

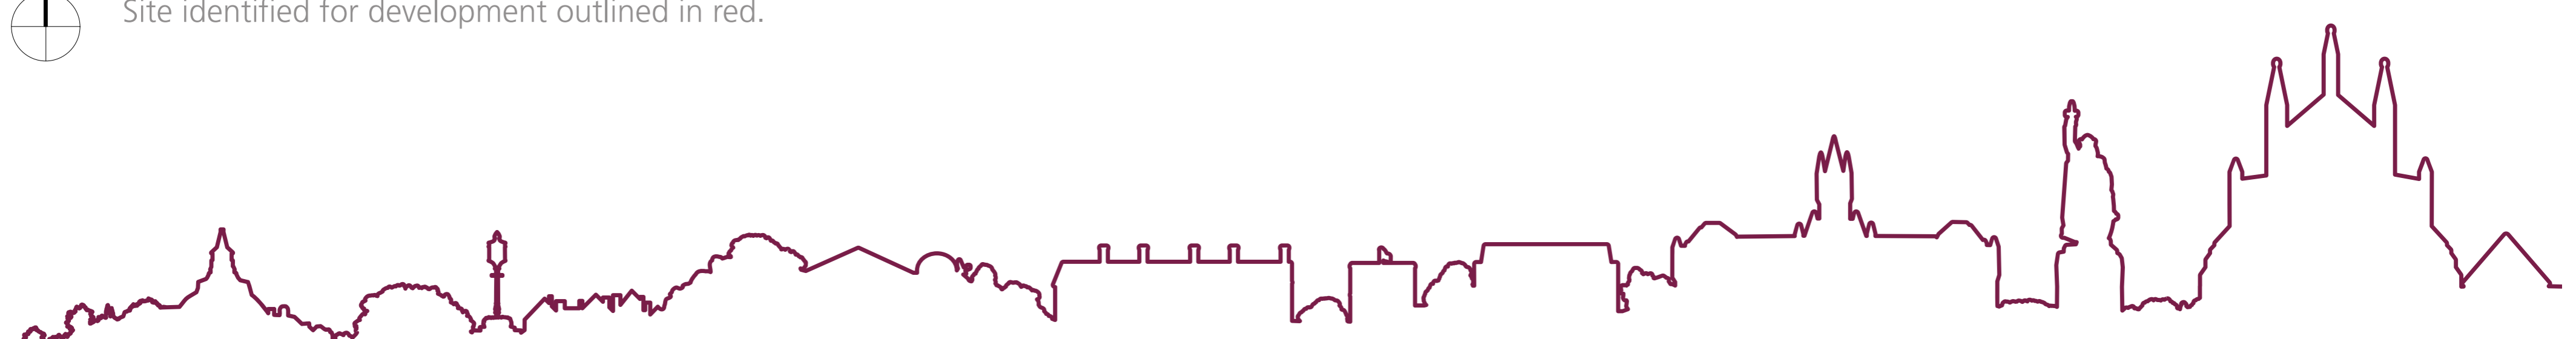

- To inform residents of the aspiration to provide new council homes for local people
- To gain comments about the proposals that are under consideration
- To encourage local people in housing need to register with Hampshire Home Choice

Why is Winchester City Council considering developing new homes at Woodman Close?

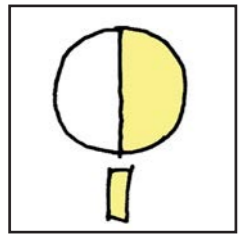

- There is a serious shortage of affordable homes in the district with demand hugely outstripping supply
- There is an identified need within Sparsholt Parish for new affordable homes
- The land identified can accommodate a small number of council homes to meet local needs
- The council is able to make significant savings by building new council homes for rent on land that it owns, ensuring value for money and that rents can be kept as low as possible

 Site identified for development outlined in red.

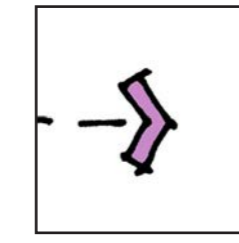

Key

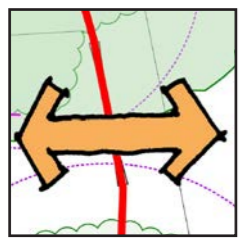

Orientation
Depicts the sun's path during the course of the day.

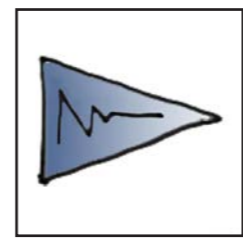

Green infrastructure
Existing trees and planting along the north and east boundaries.

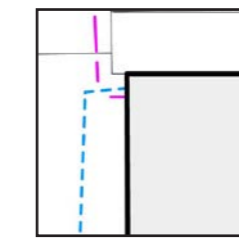

Views into the site
Views into the site from neighbouring properties.

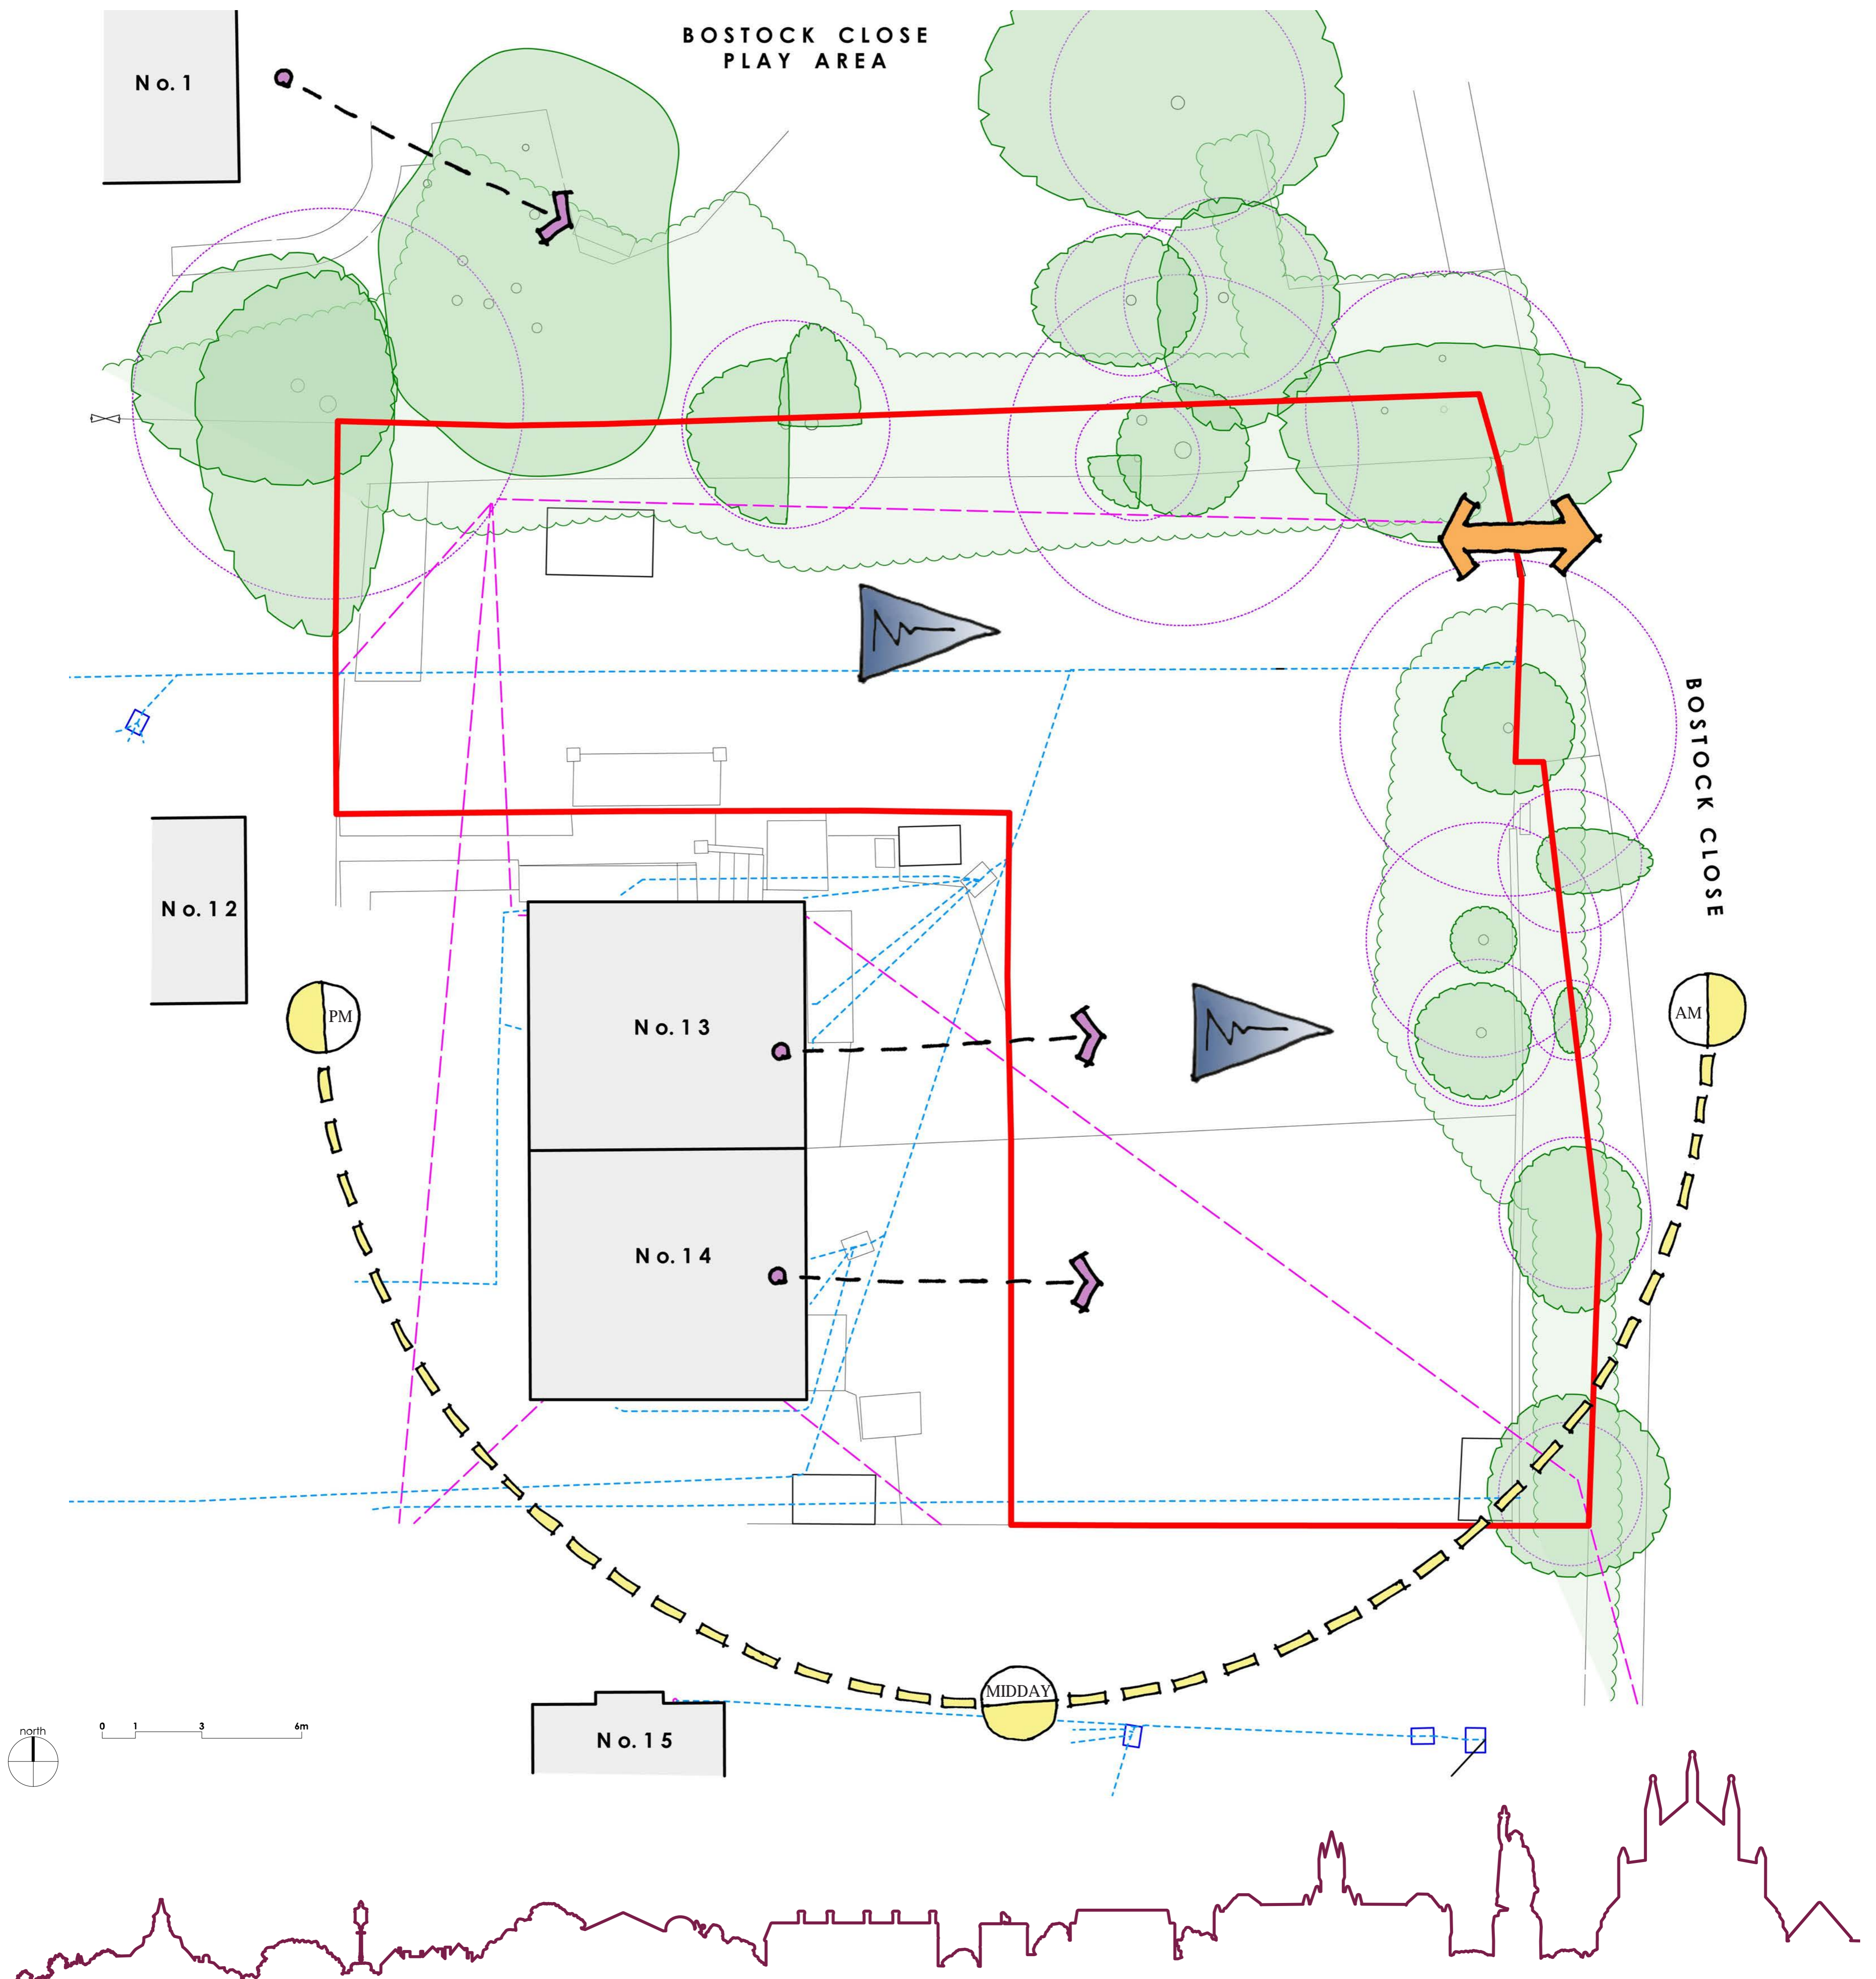

Access
Existing access into the site, from Bostock Close.

Topography
There are significant slopes across the site.

Existing services
Existing sewers and overhead cables through the site.

Communal Car Parking Options

November 2019

HOUSING FOR  WINCHESTER

Six on-street car parking spaces outside of the site would no longer be available. The council is considering the potential to provide additional communal car parking spaces within the wider area.

A Woodman Close
Additional parking in the wider area around the green (potential for up to 29 spaces).

B Stockwell Place
Formalise (white lining) parking in Stockwell Place.

Woodman Close • Sparsholt Communal Car Parking Options - Details November 2019

A Woodman Close

Two options have been proposed for how parking bays can be provided on the green at Woodman Close.

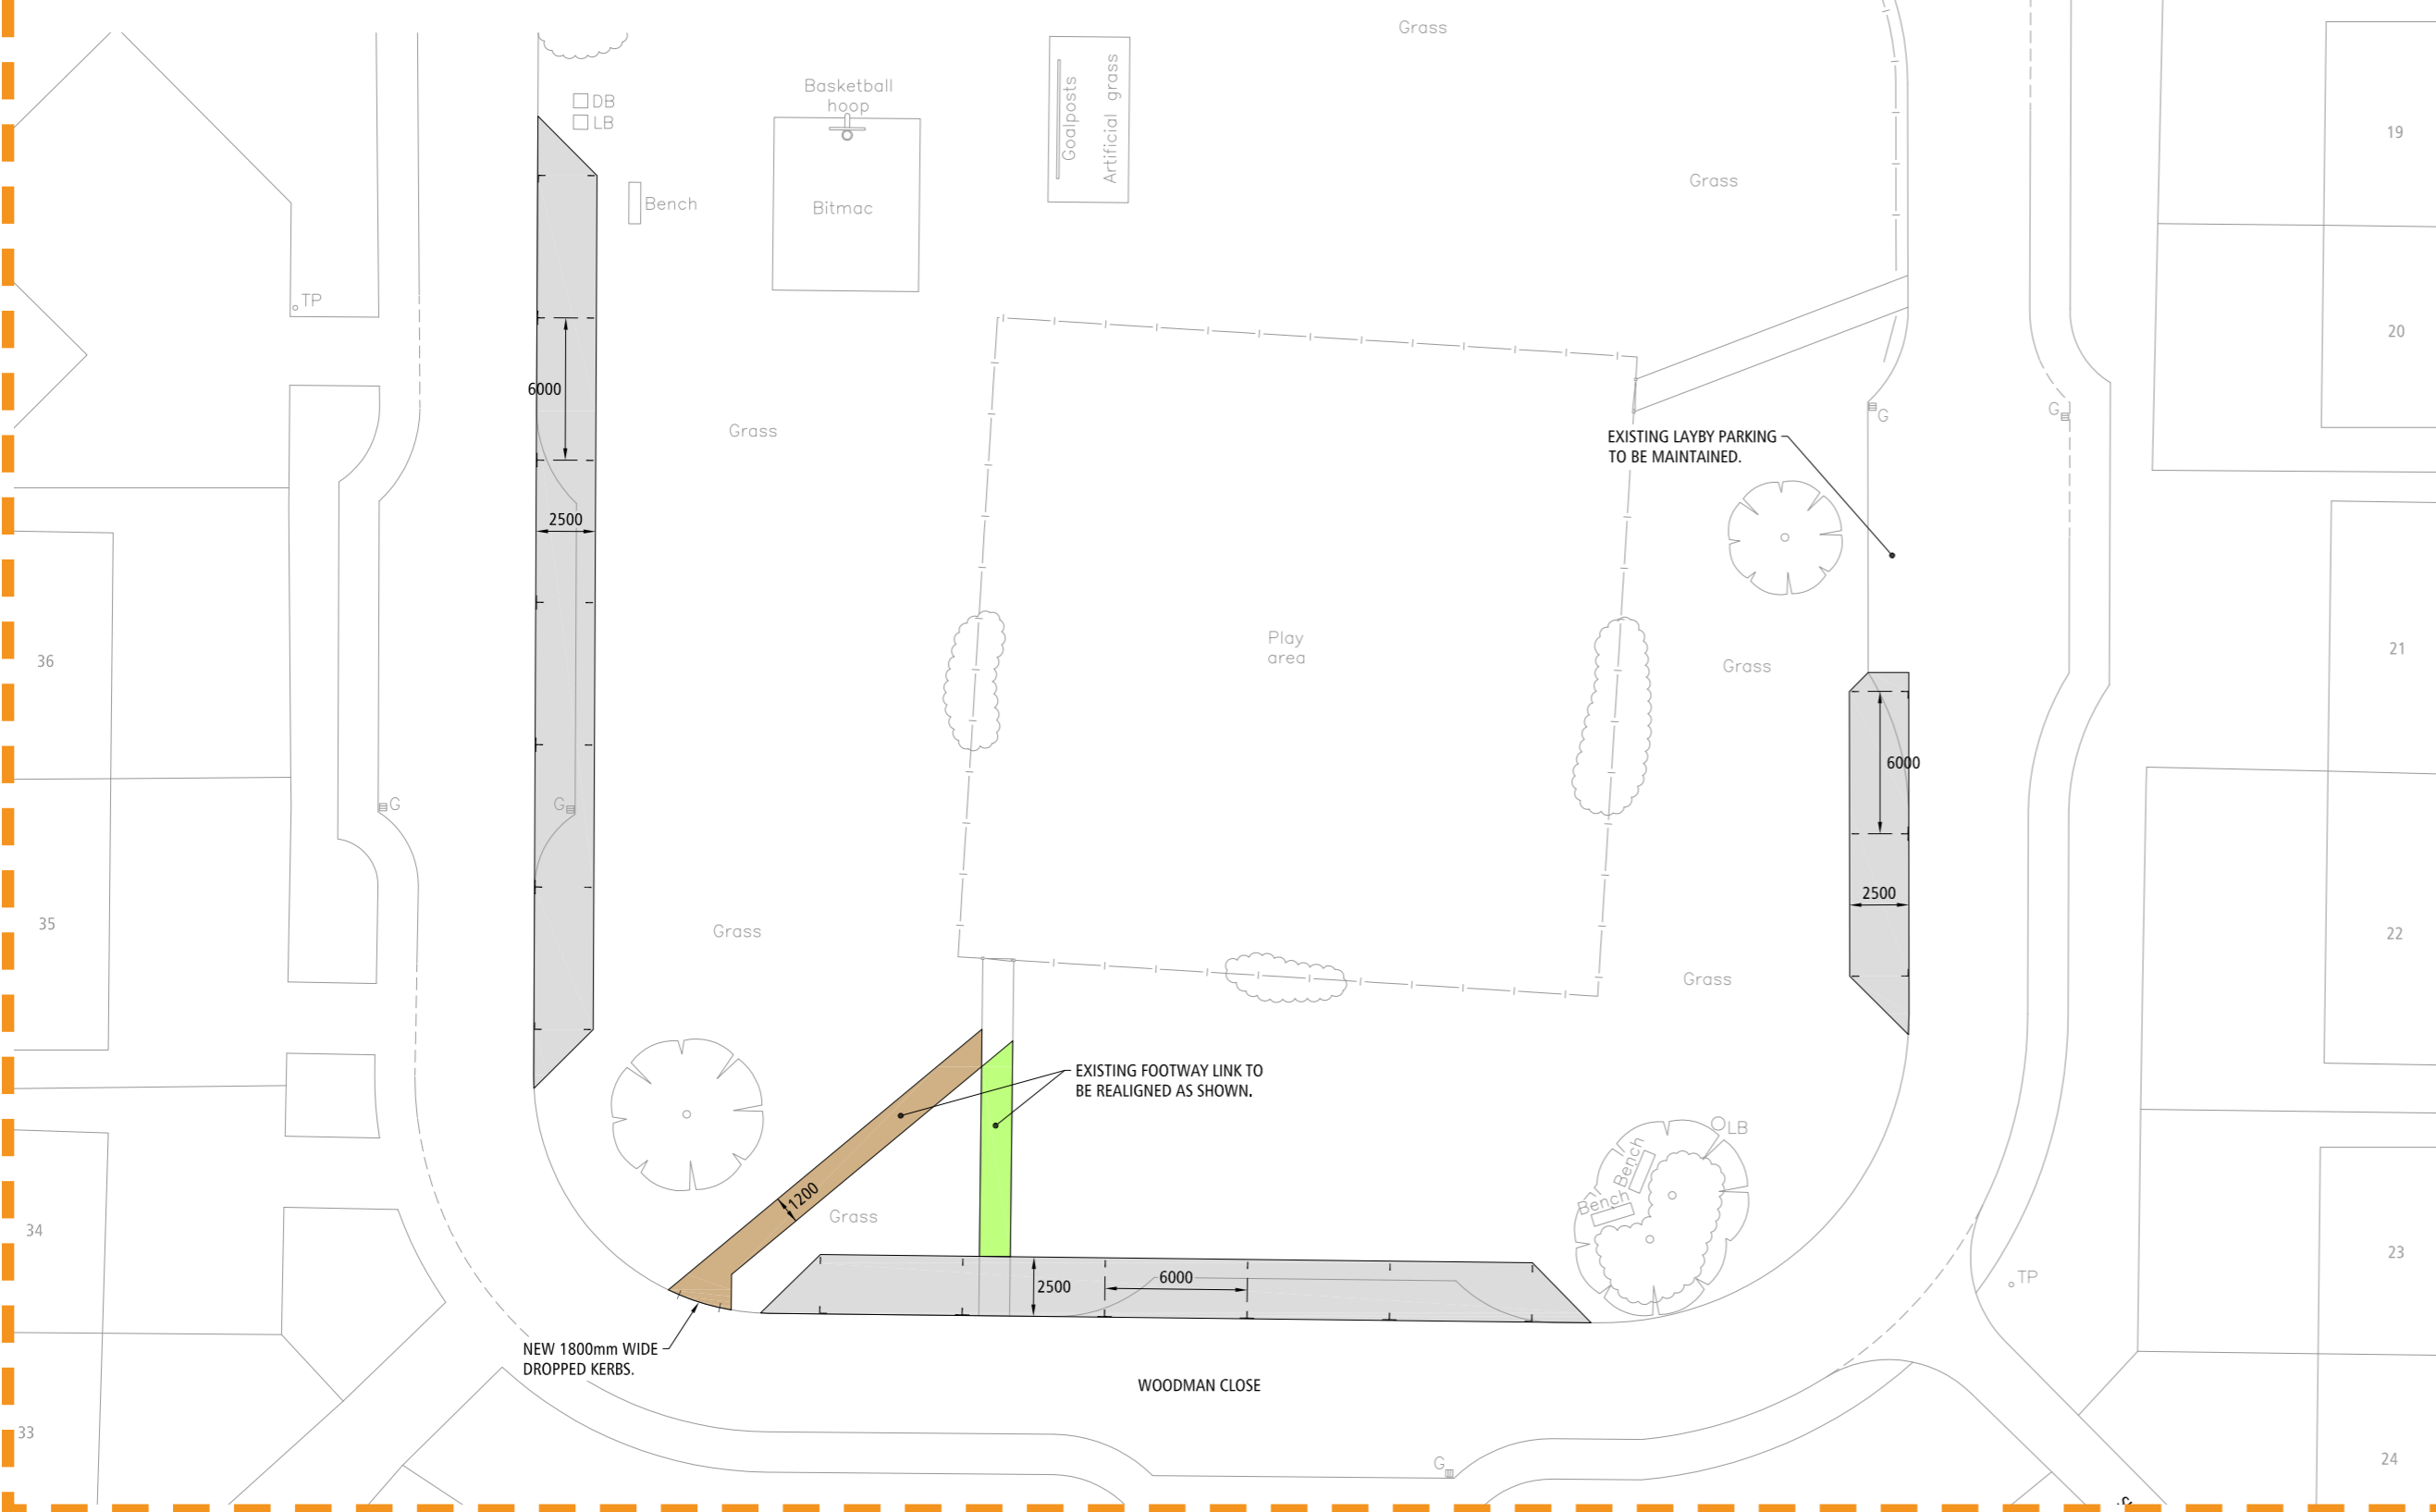

Option 1

This proposal provides a total of 29 resident parking bays on the green.

Option 2

This proposal provides a total of 13 resident parking bays on the green.

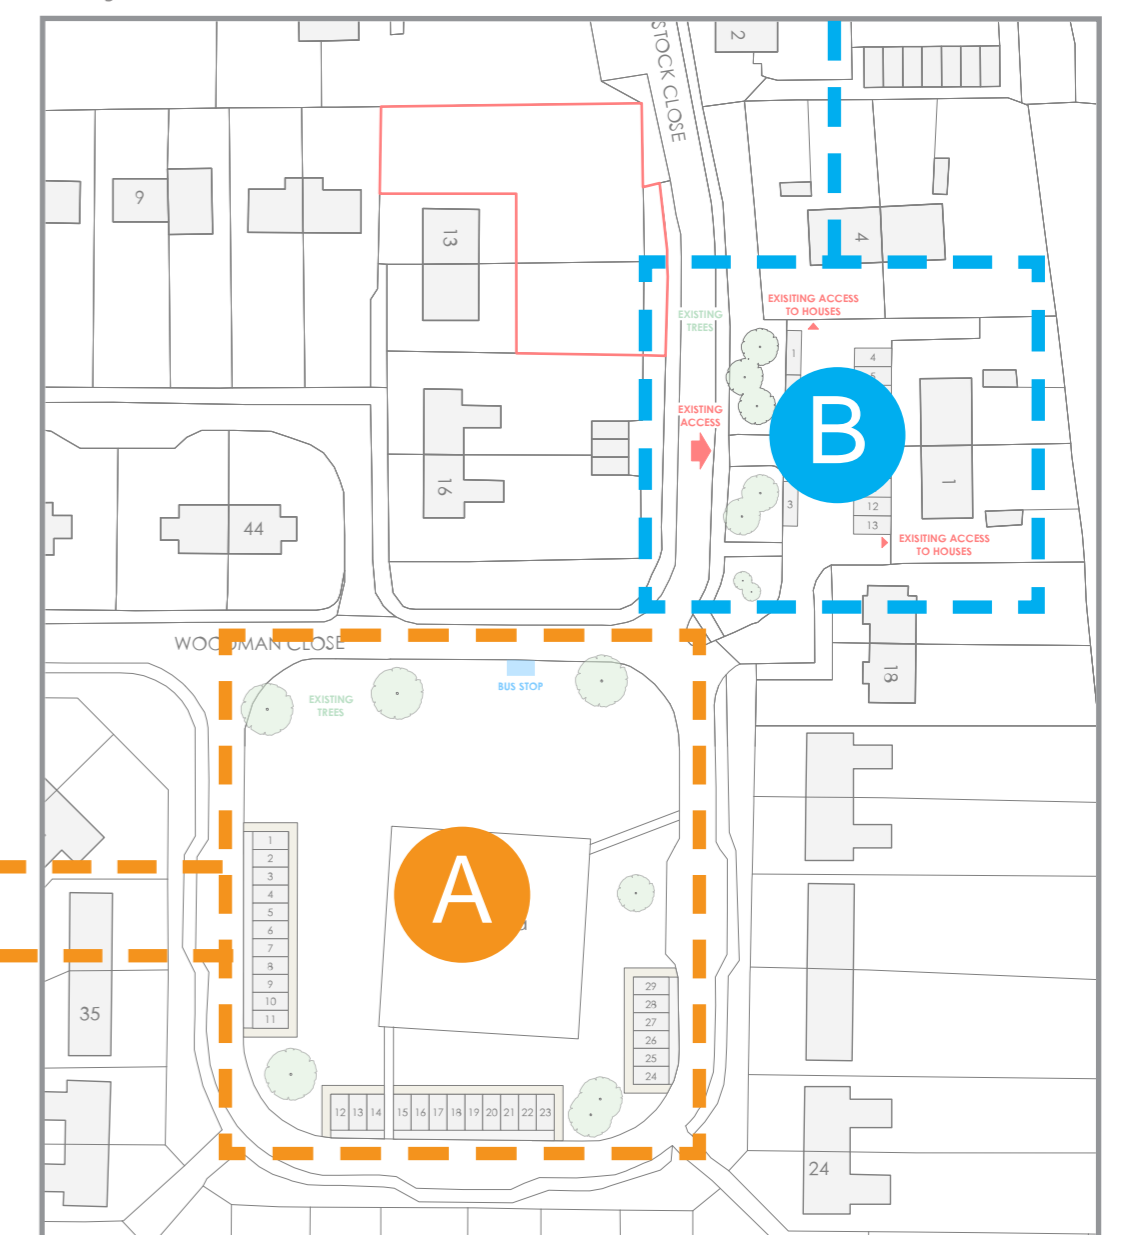

B Stockwell Place

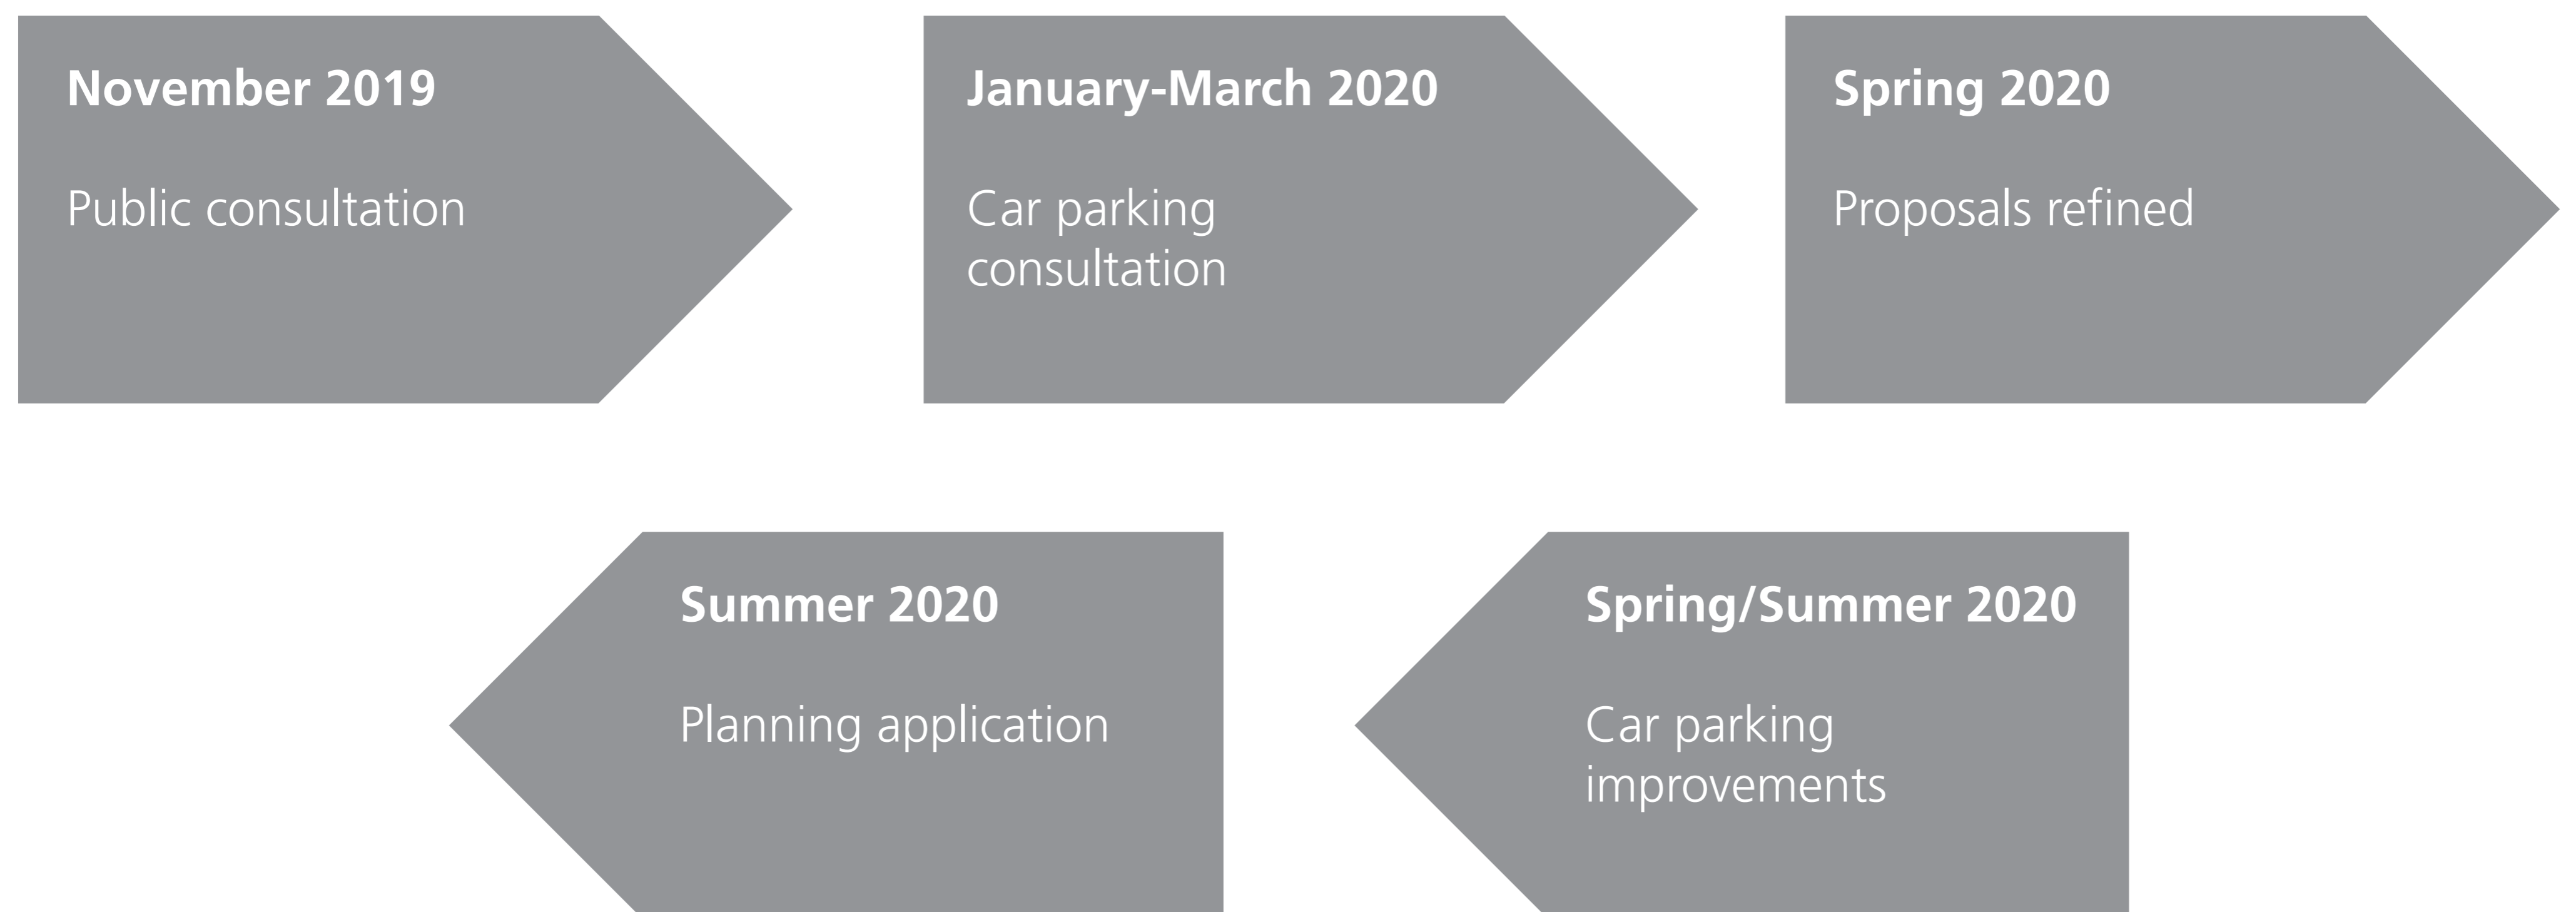

This car park could be formalised by creating lined parking bays. This would provide 13 resident parking bays.

Key

After today's consultation event, the council will consider the comments made and refine the design to take forward to a planning application.

FEEDBACK
